To the people who formalized the information in this field and turned it into a discipline.

CONTENTS

Contributors		xvii
Foreword		xix
Pre	Preface Acknowledgments	
Ac		
1.	The Respiratory System	1
	Functions of the Pespiratory System	1
	Gas Exchange	1
	Acid-base Regulation	2
	Metabolism of Drugs, Toxins, and Endogenous Substances	2
	Cardiovascular Pressure Regulation	3
	Anatomy and Physiology of the Respiratory System	3
	Cardiopulmonary Function	3
	Upper Airways	3
	Lower Airways	5
	Respiratory Zone	6
	Important Differences Among Mammalian Species	8
	Tests of Respiratory Function	10
	Spirometry and Peak Flow	10
	Subdivisions of Lung Volume	12
	Diffusing Capacity	13
	Arterial Blood Gases	14
	Cardiopulmonary Stress Testing	14
	Bronchial Challenge Testing	14
	The Respiratory System as a Portal of Entry for Toxic Substances	15
	Determinants of Respiratory System Injury	15

Diagnosis of Occupational Respiratory Disease	19
Management of Occupational Respiratory Disease	21
Epidemiological Trends in Occupational Respiratory Disease	22
Questions	23
References	24
2. Respiratory Tract Deposition and Penetration Lung Chi Chen, MD	27
Introduction	27
Deposition Mechanisms	27
Factors Affecting Deposition	31
Penetration of Particles into the Respiratory System	35
Deposition of Particles Within the Human Respiratory Tract	35
Experimental Deposition Data	35
Localized Patterns of Deposition	39
Predictive Deposition Models	40
ICRP Deposition Model	40
NCRP Deposition Model	42
Summary and Conclusion	42
Questions	42
References	43
3. Occupational Dermatotoxicology: Significance of Skin Exposure in the Warkwise	n 47
the workplace Mark Bogniger MS	4/
Introduction	47
Skin as a Target Organ	<u>4</u> 9
Types of Skin Disease	49
Diagnosis of Occupational Contact Dermatitis	54
Prevalence and Incidence of Workplace Dermatoses	56
Cost of Occupational Dermatitis	60
Causes of Allergic and Irritant Dermatitis	61
Infectious Diseases	63
Management and Prevention of Occupational Dermatitis	64

	Skin as a Route of Systemic Exposure	65
	Skin as a Contributor to Oral Ingestion	70
	Skin Route Contributing to Respiratory Sensitization	71
	Skin Anatomy and Physiology	73
	Physicochemical Characteristics Favoring Permeability	75
	Mathematical Modeling of Permeation	77
	Factors Affecting Dermal Absorption and Effects on the Skin	82
	Diagnostic and Experimental Test Methods Related to the Skin	104
	Allergens	104
	Irritants	107
	Permeation	109
	Barrier Function	111
	Questions	115
	References	116
4.	The Practice and Management of Occupational Ergonomics Miriam Joffe MS PT and David C. Alexander MSIE	135
	A Brief History of Occupational Ergonomics	135
	Background	135
	Ergonomics Versus Human Factors	137
	History	137
	Integrating the Industrial Hygienist into Occupational Ergonomics	139
	Understanding Ergonomics in Industry	139
	The Background Survey and the Structure of Industry	139
	Understanding the Production and Assembly Process	142
	The On-Site Visit	147
	A Classification System	149
	The Size of People (Anthropometry)	150
	The Strength of People (Musculoskeletal)	152
	The Control of Work by People	155
	The Endurance of People (Physiology)	156
	The Comfort of People (Environment)	157
	The Memory of People (Cognition)	157
	What Are Musculoskeletal Disorders or MSDs?	159
	Preventing Workplace Problems by Design	161

	Designing the Workplace	164
	Using Anthropometry for Workplace Design	164
	Manual Materials Handling	172
	Determining Push and Pull Limits in MMH	184
	Detecting Musculoskeletal Disorders (MSDs)	185
	Data Review	185
	Symptom Identification	186
	Observing Jobs and Reviewing Job Descriptions	186
	Correcting Workplace Design Problems	189
	Administrative Controls	194
	The Ergonomics Problem Solving Process	195
	Introduction	195
	Step 1: Identification	196
	Step 2: Investigation	199
	Step 3: Development of Alternate Solutions	205
	Step 4: Selection of the Most Appropriate Solution(s)	208
	Step 5: Implementation	208
	Step 6: Following Up	213
	The Certification Process for Professional Ergonomists	214
	Introduction	214
	Certification Levels	214
	Questions	215
	Further Readings	216
	References	217
5.	Biological Agents – Recognition	219
	Jeroen Douwes, PhD, Peter S. Thorne, PhD, Neil Pearce, PhD,	
	and Dick Heederik, PhD	
	Definition of Biological Agents	219
	Infectious Diseases	220
	Agents	221
	Transmission	222
	Workers at Risk	223
	Incidence	231
	Respiratory Diseases	232
