

BSI Standards Publication

**Water reuse in urban areas — Guidelines
for water reuse safety evaluation —
Stability evaluation of reclaimed water**

National foreword

This British Standard is the UK implementation of [ISO 24416:2022](#).

The UK participation in its preparation was entrusted to Technical Committee B/505/50, Water reuse.

A list of organizations represented on this committee can be obtained on request to its committee manager.

Contractual and legal considerations

This publication has been prepared in good faith, however no representation, warranty, assurance or undertaking (express or implied) is or will be made, and no responsibility or liability is or will be accepted by BSI in relation to the adequacy, accuracy, completeness or reasonableness of this publication. All and any such responsibility and liability is expressly disclaimed to the full extent permitted by the law.

This publication is provided as is, and is to be used at the recipient's own risk.

The recipient is advised to consider seeking professional guidance with respect to its use of this publication.

This publication is not intended to constitute a contract. Users are responsible for its correct application.

Foreword	iv
Introduction	v
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 Abbreviated terms	2
5 Water quality stability	3
5.1 General	3
5.2 Evaluation principles of water quality stability	6
6 Evaluation system of water quality stability	7
7 Evaluation parameters of water quality stability	8
7.1 General	8
7.2 Single parameters	8
7.3 Composite parameters	11
7.3.1 General	11
7.3.2 Langelier saturation index (LSI)	11
7.3.3 Ryznar stability index (RSI)	12
7.3.4 Calcium carbonate precipitation potential (CCPP)	13
7.3.5 Aggressive index (AI)	13
7.3.6 Larson corrosion index (LR)	13
7.3.7 Riddick corrosion index (RI)	14
7.4 Selection principles of evaluation parameters	14
7.5 Case study of evaluation parameters selection	15
8 Evaluation parameters of water quality stability for pipeline networks	16
9 Evaluation parameters of water quality stability for equipment	17
Annex A (informative) Information on corrosion types	18
Annex B (informative) Chemical stability guidelines for water quality in urban water supply systems of some countries	19
Annex C (informative) Guidelines for water conditioning of boiler water in Japan	20
Annex D (informative) Reuse of urban recycling water — Water quality standard for industrial use in China	21
Annex E (informative) Water quality parameter limits of reclaimed water depending on specific use	23
Annex F (informative) Modification methods based on the original AOC method	24
Annex G (informative) Biological stability guideline values for AOC	25
Annex H (informative) Comparison of measurement methods for evaluation parameters of biological stability	26
Annex I (informative) Chemical stability evaluation conclusions for different composite parameters	27
Annex J (informative) Guideline values of reclaimed water used in toilet flushing	28
Annex K (informative) Guideline values of reclaimed water used for recreational purposes	29
Bibliography	30
