
**Environmental management — Life cycle
assessment — Goal and scope definition
and inventory analysis**

*Management environnemental — Analyse du cycle de vie — Définition de
l'objectif et du champ d'étude et analyse de l'inventaire*

Contents

1 Scope 1

2 Normative reference 1

3 Terms and definitions 1

4 LCI components..... 2

5 Definition of goal and scope..... 4

6 Inventory analysis..... 8

7 Limitation of LCI (interpreting LCI results) 13

8 Study report..... 13

Annex A (informative) Examples of a data collection sheet 16

Annex B (informative) Examples of different allocation procedures 19

Bibliography 22

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

International Standards are drafted in accordance with the rules given in the ISO/IEC Directives, Part 3.

Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

International Standard ISO 14041 was prepared by Technical Committee ISO/TC 207, *Environmental management*, Subcommittee SC 5, *Life cycle assessment*.

Annexes A and B of this International Standard are for information only.
